Micro-files from US national exit polls 1972-2016 obtained from Roper Center.

List of files available here: https://ropercenter.cornell.edu/polls/us-elections/exit-polls/

Most files are available on-line for Roper Center members. Unfortunately EHESS/ENS are not members (unlike for ICPSR) so I finally decide to become an invividual member for one year dec17-dec18 (see directory Divers; login piketty at psemail.eu, password thoma0). Special files for cetain years (1994-1996 and 2004-2012) require in addition a special application and form.

(15/11/2017) Following my membership application to Roper center (), I just downloaded (via special FTP links, see directory Divers for passwords etc.) the special files for 1994-1996 and 2004-2012. All files (except for 2008, see below) are available in SPSS portable format (.por) and can be easily transformed into Stata format via Stat/Transfer. Exit poll for 2016 is still missing but should be available in early 2018.

(21/1/2018) I just downloaded all on-line (non-special) files from Roper Center for exit pools 1972-2000. All files are available in SPS portable format (.por, easily convertible into Stata), so I do not need to use the raw text files (.dat) which I had obtained in early october 2017 (via S. Stantcheva). As of 21-1-2018, the only missing file is the .por file for 2008 (I only have the .dat file, which in principle can be imported via xls, see what I did for year 2000 in october 2017, except for 2008 no variable map seems to be available); I need to send an email to Roper about this.
