

Figure S11.9. The share of inheritance in the total resources (inheritance and work) of cohorts born in 1790-2030

Inheritance made about 25% of the resources of the 19th century cohorts, down to less than 10% for cohorts born in 1910-1920 (who should have inherited in 1950-1960). Sources and series: see piketty.pse.ens.fr/capital21c.
