Notes: Geometric average growth rates. Maddison does not provide data for 1810, we use his estimate for 1820 instead (so for Maddison the 1700-1810 column actually refers to the average growth rate over the 1700-1820 period and the 1810-1910 column to the average growth over the 1820-1910 period). Maddison series were filled in for 2009 and 2010.
