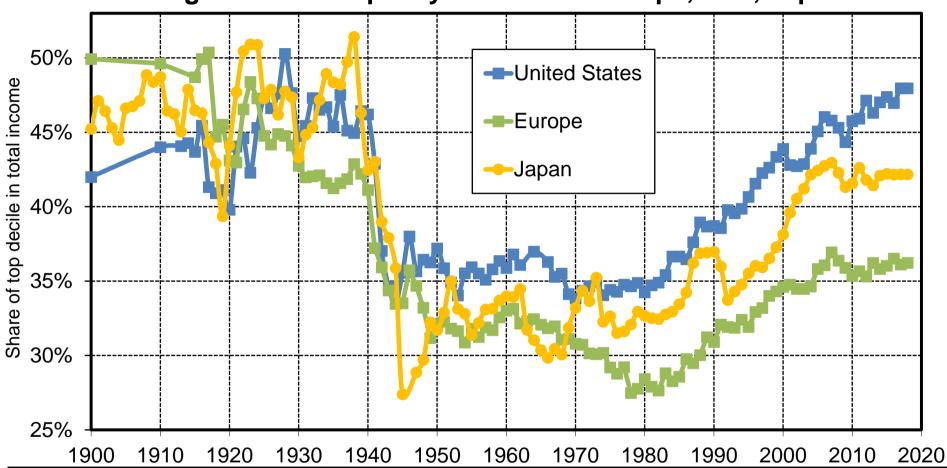

Figure S0.6. Inequality 1900-2018: Europe, U.S., Japan

Interpretation. The share of the top decile (the top 10% highest incomes) in total national income was about 50% in Western Europe in 1900-1910, before decreasing to about 30% in 1950-1980, then rising again to more than 35% in 2010-2020. Inequality grew much more strongly in the United States, where the top decile share approached 50% in 2010-2020, exceeding the level of 1900-1910. Japan was in an intermediate position.
