Figure S16.15. The politisation of inequality in Brasil, 1989-2018 16% →Difference between % vote PT among top 10% education voters 12% and bottom 90% education voters (before controls) → Difference between % vote PT among top 10% income voters 8% and bottom 90% income voters (before controls) 4% 0% -4% -8% -12% -16% -20%

Intepretation. During the 1989-2018 period, the vote in favour of PT (Workers Party) in Brasil has become more and more associated with voters with the lowest levels of income and degrees, which was not the case in the first elections conducted after the end of the military dictatorship.
